PRGF-ENDORET® KIT START PTD-O

CONTENTS

- Plasmaterm H
- Centrifuge System V
- KMU15 kit
- Tube rack
- Activation containers (ø50 mm)
- Digital timer unit

The use of this system of components and PRGF-ENDORET® technology is decisive for obtaining plasma rich in growth factors with the right biochemical composition.

ADVANTAGES OF THE ENDORET® TECHNIQUE:

- Fast preparation and application; only a few minutes depending on the required formulation.
- Functional and safe kit for both the patient and the healthcare professional. All the equipment and devices used for the technique are certified for such use.
